

LAB 3: File Structure

Mariusz Bartosik
www.mariuszbartosik.com

Aaron Borum

I didn't work with my partner on this assignment due to the fact that I started this assignment the day before it was due. This will not happen next time.

```
1 <h1>For me, the importance of this lab was to gain a better understanding of
2   structure. It's important to know where your files are at all times so that way
3   you won't be lost looking for them. Folders should be well organized and lower
4   case.</h1>
5 <h2>The difficulties I encountered were trying to get the image to show up on the
6   actual website. At first I saved the .jpg as upper case but put the code in
7   lower case. The next problem that I had was putting img/ instead of images/ for my
8   folder name. After I figured out what was wrong, I went back to correct it.</h2>
9 <h3>I learned a lot from this lab. Although I am still an extreme beginner
10  when it comes to coding, I feel like I am headed in the right direction from working
11  through these exercises. On this assignment, I did not work with my partner due
12  to the fact that I started to work on this last minute.</h3>

For me, the importance of this lab was to gain a better understanding of structure. It's important to know where your files are at all times so that way you won't be lost looking for them. Folders should be well organized and lower case.

The difficulties I encountered were trying to get the image to show up on the actual website. At first I saved the .jpg as upper case but put the code in lower case. The next problem that I had was putting img/ instead of images/ for my folder name. After I figured out what was wrong, I went back to correct it.

I learned a lot from this lab. Although I am still an extreme beginner when it comes to coding, I feel like I am headed in the right direction from working through these exercises. On this assignment, I did not work with my partner due to the fact that I started to work on this last minute.

Greetings World!

My name is Aaron & I am a designer from Salinas, California. I enjoy working on ceramics, skateboarding, and investing. I love seeking new knowledge and applying it to my daily life. I chose this major because I feel like the information that I acquire will benefit me when it comes to developing my business. Also, I'm a fun guy *Kawhi voice
