

Lab 5: More HTML
Brooke Havens & Aaron Borum
September 14, 2020

Review:

Lab 5 is designed to help solidify what we have learned thus far and further our knowledge of HTML. In this lab we will be adding the skill linking documents. I had some difficulties with this lab putting in typos and having to go through to find them. Once stepping away and coming back it was easy to see my mistakes. Everything is working great. I think making things more consistent is helping me feel better about my outcomes.

Review: I was doing good on this project until I got to the part where I couldn't link the home page on my website. I asked around on Slack but the resolutions that I got were not working for some reason. Maybe I moved a file around or something. Nonetheless, it was a very informative lab.

UPDATE: My partner helped me figure out the problem. Everything is up and running.
